)	
WASHINGTON-LEWISBURG)	
WATER DISTRICT)	
DEFENDANT)	

O R D E R

On March 2, 1984, a complaint was filed with the Public Service Commission by John W. and Barbara Perraut concerning problems they were experiencing in obtaining water service from the Washington-Lewisburg Water District ("Washington-Lewisburg"). Mr. and Mrs. Perraut had been refused a tap-on connection to Washington-Lewisburg's waterline running across their farm because of Washington-Lewisburg's contention of inadequate service pressure in the area. The Commission, after considering the matter, determined that further investigation was necessary.

On March 16, 1984, a Commission staff investigation was made of the complaint area. This investigation included the recording of service pressure at two locations near the Perraut farm and a general inspection of the water system.

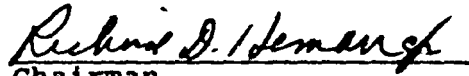

This staff investigation indicated that adequate service pressure did exist at the service location requested by the Perrauts. Based on this evidence, the Commission staff directed Washington-Lewisburg to provide water service to the Perrauts.

On July 7, 1984, Washington-Lewisburg notified the Commission that a water tap had been installed on the farm of Mr. and Mrs. Perraut. Therefore the Commission finds that the complaint against Washington-Lewisburg should be dismissed.

IT IS THEREFORE ORDERED that the complaint of John W. and Barbara Perraut against the Washington-Lewisburg Water District be and it hereby is dismissed.

Done at Frankfort, Kentucky, this 20th day of July, 1984.

PUBLIC SERVICE COMMISSION
